

"Will I make an extra profit, or will I stick to quality???"

—Whenever the grocer buys tea this is the question that comes to his mind.

If he is after the biggest profit he will never buy Red Rose Tea for it gives him less profit than other teas which he sells at the same price. But he buys Red Rose.—It has the quality.

The Farmers' Conventions

With the holding of the annual convention of the Saskatchewan Grain Growers' Association at Moose Jaw during the first week of February, this year's great gatherings of the organized farmers of the three Prairie Provinces were concluded. These annual meetings, attended by thousands of representative farmers from every nook and corner of the three Provinces, not only command the interest of every man and woman engaged in agriculture, but their deliberations are followed with the closest attention by Governments, financiers, transportation interests, manufacturers, and business men generally, as well as by all organizations interested in social and moral reforms.

To the casual onlooker at one of these big gatherings—so big that it is next to impossible to secure auditoriums large enough to accommodate the delegates, not to mention visitors—they are too big to permit of that careful consideration and intelligent grasp of the important questions which come up for decision and action. At times the conventions appear to become unwieldy, almost unmanageable, and somewhat confused as to the issue before them because of a multiplicity of motions, amendments and amendments to the amendment. No doubt a delegated convention restricted to two or three hundred men and women, selected from districts, could transact business more expeditiously.

But smaller conventions would result in loss of some of the most apparent and undoubted advantages of these big gatherings. The big convention is a veritable dynamo for the development of enthusiasm in behalf of those particular reforms to the accomplishment of which the organized farmers have set their hands. These large gatherings provide ample opportunity for hundreds of men and women to attend who otherwise would never receive the inspiration inseparable from such a gathering together of people engaged in a common task and confronted with common problems. As a result, each succeeding convention sees many new faces in the audience, and the influence of the farmers' movement is thus more widely spread over this agricultural land.

It might be feared that such manifestations of glowing enthusiasm would lead to ill-considered, hasty action. The opposite appears to be true in most instances. Year after year resolutions from individual locals calling for radical and even drastic action are considered by the conventions, but when facts are given and new light thrown on the subject of which the Local was not aware, the big convention invariably rejects the resolution, fully or adopts it in a very much modified form. The ultra-radicals are respectfully listened to, their point of view considered, and then the good judgment and sane common sense of the vast majority render a decision. These annual conventions, therefore, have a steady influence. They clear the atmosphere of much fog which gathers in local spots throughout the year. This, indeed, is one of the most valuable features of these big annual get-together meetings.

And the big conventions are fair and open-minded. "Equity" is the motto of the organized farmers of the West. Emphasis is laid upon it at every convention. And the delegates strive earnestly to live up to it. Anything unfair or underhand is immediately scorned by these big gatherings. Personalities are strictly out of order. The organized farmers are demanding justice for themselves in the carrying on of the primary and basic industry of the Dominion, they recognize the right of everybody else to just treatment, too. They are not asking for special privileges for themselves, and feel there is no injustice in fighting against the continuance of such privileges now enjoyed by others. Complete equity all round is their motto and also their fighting ground.

The conventions in all three Provinces this year had two outstanding questions before them—the much talked of "wheat pool" and the proposal that the farmers' organizations as such should enter the Provincial political arena in their several Provinces. The idea of a "wheat pool" was enthusiastically endorsed, because the wheat growers have become firmly convinced that the methods which have so long prevailed under which their chief product becomes the plaything of market speculators must cease. They have too much at stake to allow such methods to continue indefinitely. Two avenues of reform seem to present themselves—one, action by the Federal Government, two, co-operative action by the farmers themselves. Failing the first, the farmers are determined to evolve some plan whereby the second may be brought into practical operation. But no hasty, ill-considered steps were taken. There was general appreciation of the magnitude of the task before them—the biggest ever attempted by organized farmers. The huge financial and transportation problems involved were fully and frankly recognized, but there was a grim determination in evidence to find a solution to these, and the Executives were authorized to proceed diligently with the work of finding the solution. It was also made clear that in this task the farmers would have the active sympathy and support of the Western Provincial Governments.

As to the advisability of entering Provincial politics, opinions differed. In some Provinces the majority view favored such action; in others the majority opinion was that such action was not necessary, that the time was not ripe for it, and that to force it would be ill-considered and a mistake. But so far as Federal action is concerned, there was absolute unanimity—the farmers are going to fight as a body in the next Dominion election.

To Encourage

Research Work

Manitoba Girl Gets Research Fellowship of Hudson's Bay Co.

Miss Irene Mounce is announced as first appointee under the Hudson's Bay Company Research Fellowship, which was established last spring on the occasion of the 250th anniversary of the founding of the company. The purpose of the fellowship is to encourage research in some branch of pure or applied science.

Miss Mounce holds the degree of M.A. from the University of British Columbia and is at present studying at the University of Manitoba in the department of botany, as holder of the studentship under the Dominion Council of Scientific and Industrial Research.

Miss Mounce purposes working out her new fellowship at the Manitoba University under the direction of Prof. Buller, where she will continue her research on the diseases of forest trees.

B.C. Goatbreeders.

With a membership of 465 breeders in the Goatbreeders' Association, British Columbia now claims to be the leading goat producing province in the Dominion. Altogether the various owners possess five thousand head of stock. Several splendid purebred males and females were exported last year.

Where Money Is Tight

Everybody suffers, when boots are tight your corn suffers, but they can be painlessly relieved by Putnam's Corn Extract. It is guaranteed in all cases. Use only Putnam's, 25c at all dealers.

Want Compensation

Want Government to Increase Compensation Paid for Tuberculosis—Stock Killed.

A resolution to the Dominion Government asking increase of the basis of compensation for grade dairy cows slaughtered after tuberculosis tests from \$80 to \$120, was carried by unanimous vote at a meeting of the Calgary and District Milk Producers' Association. The actual compensation paid is two-thirds of \$80 at the present time, the owner retaining the carcass after slaughter.

HOW TO SAFEGUARD YOUR DIGESTION

The Blood Should Constantly be Kept Rich and Pure.

If you suffer from any form of indigestion your diet should be carefully chosen. Over-eating is always harmful, but at the same time one must take enough food to supply the needs of the blood. It must be remembered that the blood has to carry nourishment to every part of the body, and fuel for its energy and defences against disease, as well as the requisite juices for digestion. Hence when the blood becomes weak and fails to do its work, indigestion arises; also when indigestion begins the blood still further suffers. Therefore, to safeguard your digestion, the blood should be kept rich and free from impurities. For more than a third of a century Dr. Williams' Pink Pills have been a favorite tonic for enriching the blood and strengthening the nerves. If, therefore, you find yourself troubled with indigestion or other ailments due to weak, watery blood, you will find Dr. Williams' Pink Pills both safe and effective. The value of this medicine in cases of stomach trouble is shown by the experience of Mrs. J. Lewis, Lake George, N.S., who says: "I suffered very severely with indigestion. I had severe pains in the stomach after every meal. I had a loathing for my food, and at night was very much disturbed, and my general health was declining. I was under a doctor's care, but did not find any improvement. Reading of what Dr. Williams' Pink Pills had done in a similar case I decided to try them with the result that after giving them a fair trial, my general health was improved, and all symptoms of the indigestion that had afflicted me disappeared. I feel very grateful to Dr. Williams' Pink Pills for saving me from so much misery. Dr. Williams' Pink Pills through any medicine dealer, or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont."

The Wool Market.

Canadian wools continue to sell on the basis of small lots. Stocks of Canadian wools on hand are estimated at not more than enough to meet the working demands of the mills, from now till the new clip arrives. The market for pulled wools remains slack, but there are no large supplies of such wools on hand. As the bulk of combing lengths have been exported, Ungraded wools are quoted as follows: Coarse, 18c; fine, 20c; very fine, 22c; washed 25c. Graded wools are still quoted from 28c for finer grades running down to 17c and 16c for coarse wools.

BABY'S OWN SOAP

Best for Baby Best for You

For Beauty—

Keep the skin clean, soft and white by regular use of Baby's Own Soap. Lather freely with tepid water—rinse well and rub gently with a soft towel—the skin is improved—the complexion heightened and the lingering fragrance of roses radiates an added charm (only natural flower extracts are used to give Baby's Own Soap its exquisite aroma). ALBERT SOAPS Limited, MONTREAL 191-21

Births in England Reach Peak in 1920

Births in England and Wales during 1920 reached the highest figure ever recorded, and the death rate was the lowest, according to an official report of the Registrar-General. The birth rate per thousand of total population was 26.44 and the death rate was 12.4.

The deaths of infants under the age of one year were 80 per thousand.

Mild Epidemic Going Round

It is due to impurities in the water, causes cramps, diarrhoea, headache. Those who take twenty drops of Noralgine in sweetened water usually get quick relief. It is really wonderful how good old Noralgine fixes up a sour upset stomach, how it stops hiccoughs, how quickly it puts a stop to those nasty attacks of gas. Every home should keep a bottle or two of trustworthy old Noralgine on hand. 35 cents everywhere.

Experience is one of the few things that never find their way to the bargain counter.

Good Chances to Leave

Bacon—Did you hear my speech at the dinner? Egbert—Oh, yes. "I studied it very carefully." "Indeed?" "And did you follow my gestures?" "Oh, yes. I left just as you were pointing toward the door."

And it is sometimes necessary to put a man out to find out what is in him.

Minard's Liniment For Diphtheria.

Canadian Egg Market.

It is very difficult to give any statement as to the basis of trading in the egg market. Current receipts are reported to be so good in quality that the demand for graded eggs is falling off.

The rapid growth of the nail is an indication of health.

State of Ohio, City of Toledo, Lucas County.

Nothing But Sympathy. "Then you have no sympathy for the deserving poor?" asked the man who was collecting for charity. "Me?" replied the rich man. "Why, sir, I have nothing but sympathy for them."

"Oral Hygiene" Lay Education Series

"YOUR TEETH"

Second Stage of the Decay of the Teeth.

By Rea Proctor McGee, M.D., D.D.S., Editor Oral Hygiene.

When that sharp little pain warns you that another tooth is going, it always seems "so sudden," so unreasonably sudden. The enamel is not sensitive but the dentine that forms the body of the tooth and fills all of the space between the enamel and the nerve, is full of thrills.

Where the enamel and the dentine meet, the tooth is more sensitive than at any other place except on the nerve; the teeth are particularly sensitive at the margin of the gum.

As the little bacteria of decay get further into the dentine, they send scouts out ahead along the fibres that extend from the nerve. That is why the dentist seems to do such a tremendous lot of drilling in a cavity. If he didn't go well beyond the farthest particle of decay, his filling would be a failure.

The decay spreads out underneath the enamel as the acid produced by the bacteria eats away the time that forms the hard part of the tooth. This causes the cavity to be larger usually on the inside than it is at the entrance.

Food and debris collect in a remarkable line of mucus called the cavity line. It will be required to keep it where the Lord intended it should be. In the mouth are more than two hundred different kinds of bacteria. Most of them thrive upon decaying food. In addition to the pain and destruction these cavities cause, they mix this poisonous mass with every bite of food and help wreck the delicate machinery of digestion.

Even at this stage the tooth may be saved without the nerve being destroyed, but it is rapidly getting to the point where long and patient treatment will be required to keep it where the Lord intended it should be.

In the mouth are more than two hundred different kinds of bacteria. Most of them thrive upon decaying food. In addition to the pain and destruction these cavities cause, they mix this poisonous mass with every bite of food and help wreck the delicate machinery of digestion.

"I Cannot Go"

BILIOUS headache spoils many an expected enjoyment.

When the condition of the liver is neglected, biliousness seems to become chronic and recurs every two or three weeks, with severe sick headaches.

Why not get right after this trouble and ease it by report Dr. Chase's Kidney-Liver Pills to restore the health and activity of the liver.

Constipation, indigestion, backache, headache, biliousness and kidney derangements soon disappear with the use of this well-known medicine.

One pill a dose, 25 cts. a box, all dealers, on Dispensaries, Bates & Co., Ltd., Toronto.

Cost of Farm Labor

Wages Reached Unheard of Level During 1920.

The United States Department of Agriculture has issued a report on farm wage rates which says that wage rates for farm labor reached highest point in history of this country in 1920, as national averages. As ascertained by Bureau of Crop Estimates, average wage rate for labor hired by month was \$46.89, with board, and \$43.36 without board; for day labor at harvest, \$2.86 with board, and \$3.59 without board.

Do not suffer

from PILES. Dr. Chase's Ointment will relieve you at once. It cures itching, burning, and all other troubles. No surgical operation required. Write for free sample and full directions on each bottle. Do not pay postage.

MOTHER!

"California Syrup of Figs" Child's Best Laxative

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless physic for the little stomach, liver and bowels. Children love its fruit taste. Full directions on each bottle. You must say "California."

"DANDERINE"

Girls! Save Your Hair! Make It Abundant!

Immediately after a "Danderine" massage, your hair takes on new life, lustre and wonderful beauty, appearing twice as heavy and plentiful, because each hair seems to fluff and thicken. Don't let your hair stay lifeless, colorless, thin or scraggly. You, too, want long, long, strong, beautiful hair. A 35-cent bottle of delightful "Danderine" freshens your scalp, checks dandruff and falling hair. This stimulating "bayer-tonic" gives to thin, dull, fading hair that youthful brightness and abundant thickness—all day long.

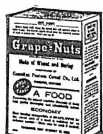

Youngsters grow husky on Grape-Nuts

The great body-building values which Nature stores in wheat and barley, are retained in this easily digestible food.

The unique, sweet flavor of Grape-Nuts makes it a big favorite with both children and adults.

"There's a Reason"

SOLD BY GROCERS EVERYWHERE

The Industrial Outlook In Western Canada Is Full Of Promise

The Government of the Province of Alberta, through its Statistical Branch, makes the statement that and admittedly conservative estimate of the value of farm production and of live stock on the farms within the province at the end of 1920 reaches a total of over \$430,000,000. It can be said that the agricultural and live-stock values of the other Prairie Provinces of Manitoba and Saskatchewan would come within reasonable bounds of, or may exceed, Alberta's total, and thus a sum of over one billion dollars is seen as the value of agriculture of the western prairies.

In looking at the future of the west, it is permissible to emphasize the small proportion of available agricultural land that is today under cultivation as compared with the total area of arable land available for tillage and stock grazing. To these factors must be added the values of agriculture, minerals, forests, fisheries and other resources of the province of British Columbia, as well as similar resources in the prairie provinces, and the as yet undiscovered or unproven potential wealth such as oil and other assets of the west.

Canadians taking into consideration these well-known facts, realize that in a country yielding so abundantly there is only reason for progressive development and no reason whatsoever for doubt of a continuance of prosperity.

It is a noticeable fact that the movement towards normal trading conditions has already commenced. Factories that have been working part-time or with reduced staffs are taking on additional men, and by the end of January a large number of plants will be again in full operation. In country districts, merchants are sending in orders to replenish stocks and the commercial traveller is finding conditions rapidly improving. The unemployment which has never been excessive, has been taken care of in a practical way, and a few weeks will see the absorption of a large proportion of those seeking work.

On the Pacific Coast, discussions are now taking place with a view to a price-cut in logs while the retail lumber trade has under review the necessity of reducing cost of production. Campaigns are already anticipated looking to a continuance of active housing plans, and prospective building programs a better year than that of 1920. In Manitoba, the extension by the Manitoba Power Commission of power lines to 40 rural districts is asked. At Kenora, a large pulp mill is to be erected with one or two other pulp mills at Port Arthur and Fort William, one at Harrison, B.C., and another on Massett Island, B.C. Provincial engineers are figuring on construction of public buildings, more especially for university extensions and utilities, and large sums of money are to be expended on main and rural roads throughout the west.

So far as one can see, the promise is for many activities along all lines of development, and it is not difficult to forecast a period that will bring with it a maintenance of the prosperity of the Canadian West.

Farm Education In Alberta

Three New Agricultural Colleges Opened in Different Parts of the Province.

In regard to population, Alberta has more agricultural students than any other province of Canada, and a total of 640 young men and women are in attendance at its agricultural scholastic establishments this year. With the growing demand for practical farm education, three new agricultural colleges were opened in different parts of the province this winter at a cost approximately half a million dollars. All the schools are fully equipped with the most modern farm paraphernalia and offer fine courses in every branch of farm activity.

Maxims.

Maxims posted on the walls of his bank by the elder Rothchild: "Dare to go forward. Never be discouraged. Never tell business lies. Be polite to everybody. Bear all trouble patiently. Do not reckon upon chance. Maintain your integrity as a sacred thing."

Consumption From Milk.

Twenty-five per cent. of the tuberculosis in persons under 15 years of age, is due to bovine sources, Dr. W. A. Shultz of the Manitoba Board of Health told a convention of Women's Institute recently.

Canadian Shoe Industry

Sixty-Three Million Dollars Worth Manufactured in 1919.

More than nineteen million boots, shoes, moccasins, etc., with a sale value at the factory of approximately sixty-three million dollars, were manufactured in Canadian factories during 1919, according to figures compiled by the Dominion Bureau of Statistics. A preliminary report on the leather, boot and shoe industry, covering the operations of 161 individual plants, has been prepared by the Bureau. The location of the plants is as follows: Quebec, 91; Ontario, 56; New Brunswick, 5; Nova Scotia, 4; British Columbia, 5. The total capital invested in these plants, according to the report, was \$38,680,581. Male employees to the number of 9,755, and female to the number 5,586, were engaged in the work of turning out boots and shoes, and were paid \$13,250,744 salaries and wages for the year. Of this number 612 were paid under \$5 a week wages, and approximately 1,200 were under 16 years of age. The total cost value at the factory of materials used in manufacture, according to the report, was \$40,523,696.

Save the Forests

Every Citizen of Canada Is Interested In Forest Preservation.

T. A. Sparks, president of the Western Retail Lumbermen's Association, touched upon a real need when addressing the recent annual convention of the association. "Every citizen of Canada," asserted Mr. Sparks, "is interested in forest preservation," and he pointed out that in the last 75 years by fire alone a loss had been sustained equal to 40 years' supply at the present rate of consumption. "Unless a live interest is taken by every Canadian," he stated, "we are going to see the end of our prairie timber in 25 years and of our entire Canadian supply in 50 years, and the elimination of the employment of over 100,000 men in an industry in which is invested 300 millions of capital." The growth of the pulp and paper industry is one of the greatest industrial developments which the Canadian people can count upon—if we save our forests.

Invest in Health

Find a Game to Play With Exercise.

Walk to work. If you cannot walk the whole way walk part way. Those lungfuls of fresh air, those shafts of sunshine and that swing of legs may make all the difference between sickness and health. Find a game to play with exercise in it. The social contact of the game occupies and relaxes the mind while the exercise is building the body almost unconsciously. But never let the game grow mechanical. Who goes skating and comes home never knowing whether the stars were out, who plods over the golf course never knowing whether the foliage is red with October or green with May, has missed half the point of the game.

Have you a hobby? If not, find one. And preferably let it be a hobby with fresh air and exercise in it. Ride your hobby down any road where the guidepost points to Rest and Recreation, and you come at last to the village inn At the Sign of the Good Digestion.

There are no short cuts to health. Dr. Common Sense is the best medical authority. Health, like generosity, is its own reward. It pays rich dividends to every honest investor.—Boston Globe.

Pacific Coast Fisheries

Success of Captain Martinson and His Crew During the Past Season.

An instance of the revenue to be derived from the Pacific coast fisheries is that of the success of Captain Tony Martinson and his crew during the past season. In addition to board and keep at work, each member of the crew received 100 pounds dollars cash. Martinson's revenue was much larger. He has been able to buy a \$10,000 vessel and still has a net surplus left from his last season's catch.

A French banknote of small denominations, after being in circulation for some months, was recently examined by French scientists, who discovered 80,000,000 bacilli thriving on it.

Big Paper Mill for West

Considerable Interest Is Developed In Recent Order-In-Council.

The Manitoba Free Press publishes the following from its Ottawa correspondent:

"In view of the extremely acute situation which was experienced during the greater part of last year by reason of newspaper shortage and the high prices demanded by the manufacturers, great importance will be attached to an order-in-council just passed by the Federal Government, which, it is expected, will result in the construction in the near future of a large pulp and paper mill in Western Canada.

"This order-in-council, which has just been signed by the Governor-General, provides for offering for sale by either public auction or competition by tenders, a large pulp wood berth covering certain Dominion and school lands lying east of Lake Winnipeg in the province of Manitoba. The total available area is estimated at approximately 718 square miles.

"The bidder or tender, as the case may be, will be required to enter into an agreement with the Minister of the Interior, representing the Crown, to erect within the limits of the berth or at some other place, approved by the minister, a pulp and paper mill costing with equipment and machinery not less than \$1,000,000, and further, that he will operate the mill in such manner that the daily output shall not be less than 100 tons of pulp. At least 50 per cent of this pulp must be manufactured into paper at the same plant.

Prosecuting War Criminals

Germany Asks For Help And Assistance Of Allies In Conducting Cases.

The German government has asked permission to send a qualified representative to confer with the British, French and Belgian judicial authorities in an effort to accelerate the prosecution of persons charged with war crimes in the preliminary list submitted by the allies. Britain is the only country appealed to that has consented, and a representative of the German foreign office will leave for London to confer with representatives of the British department of justice on the manner of conducting the trials.

Of the 45 persons in the preliminary list submitted by the entente 13 are declared to be dead or their whereabouts unknown, says a despatch from Berlin. The proceedings instituted against the other 32 have resulted inconclusively, it is learned, because of the absence of tangible evidence against them. The British government furnished data in the case of seven of the accused men, but this evidence, it is claimed, has been found lacking in the concrete facts necessary to carry on prosecution before the German court trying the cases at Leipzig, which also demands that the accusing witnesses be present.

Lord Robert Cecil

Shows Combination of Good Sense and Inflexible Purpose.

It is not too much to say that, of the enormously important and critical first meeting of the Assembly of the League of Nations, it was Lord Robert's sane idealism which saved the whole even from failure, and that it was his personality which from first to last dominated the Assembly. That shows what can be done by the combination of good sense and a large group of selfless and inflexible purpose for a great and just end. Lord Robert displayed on that occasion. And the same qualities will beyond doubt last in other fields as opportunity offers. Nothing can be more foolish than to underestimate the power of a single vigorous personality directed with perfect distinctness to just ends. And, let it be said, the British people love such a man and are quick to recognize him. Cleverness and adroitness count no doubt for much, for far too much, in the game of politics. But honesty and character in the end count for more.—Manchester Guardian.

Boring for Oil at Rush Lake.

A real test of the Imperial Oil Company's prospect well north of Rush Lake and 45 miles northeast of Swift Current will be made before drilling operations are suspended, according to Angus Sutherland, one of the two experienced drillers engaged in sinking the well. The well is to be sunk to a depth of 2,500 feet, unless oil or gas is struck at higher levels. If the hunt depth is found necessary, operations will undoubtedly continue until next fall.

Six hundred women were executed in France for witchcraft in 1609.

Will Reside in Ottawa

R. S. Miller, prominent Regina Rotarian and business man, who is leaving that city shortly to take up his residence in Ottawa.

Sun Nearest in Winter

About Three Million Miles Nearer the Sun in January Than at Midsummer.

Incredible as it may seem, the earth is about three million miles nearer to the sun early in January than it is at midsummer. The respective distances, to be exact, are 91,345,000 miles in January, and 94,450,000 miles at the end of June or the beginning of July. Why, then, is it not warmer in the winter than in summer? Simply because our part of the earth is tilted away from the sun in winter, thus giving us long, dark nights. Another strong reason is that during the winter days the sunlight falls on our region of the globe at such a sloping angle as to give very little heat. If the earth's annual path were a perfectly circular one we would be, of course, always at the same distance from our luminary, but as it is not circular we are either constantly getting further away from or nearer to the sun. Another interesting fact is that the nearer we are to the sun the faster we move. Our average speed round the sun is 18 1/2 miles per second, and in that brief time the earth departs from a straight line by only the one-ninth part of an inch.

Canada's Navy

American Paper Commends Dominion On the Start Made.

It is altogether fitting that Canada should be given the nucleus of a national navy, now that peace has been finally won at the point of the sword. A Canadian navy, manned and officered by Canadians, will foster among all Canadians a commendable pride in their national achievement. It will at the same time serve as a guarantee of the rights of Canadian merchant ships on the high seas. An efficient and well-trained Canadian navy, however small in size, will always be a valuable addition to the British Imperial Navy. Its creation should, therefore, be endorsed both by the British Admiralty and the British people. A Canadian navy can never endanger the peace of the world, nor menace the liberties of mankind.—Boston Transcript.

Another Province

May Yet Form a Tenth Province of Canada.

The Northwest Territory which was left over when the provinces of Saskatchewan and Alberta were organized may yet form a tenth province of Canada. Much has been learned about the resources of this district in the last seventeen years. The oil discovery at Fort Norman gives more definite knowledge of one kind of natural wealth. Arctic exploration is revealing other resources and possibilities are under investigation and experiment. The greater part of the Territory is yet practically an unknown land. The oil discovery at Fort Norman will stimulate further exploration. We may expect that in the coming session of parliament some provision will be made for the administration of the district in accordance with its importance.—Vancouver Province.

Creameries Pay 8 Per Cent.

The Co-operative Creameries in the province of Saskatchewan did over \$3,000,000 business in 1920, compared with \$2,500,000 in 1919. The shareholders, all of whom are farmers in the province, were paid in advance a dividend of eight per cent.

The first English newspaper proposed to do no more than publish news which had already been published abroad.

W. N. U. 1356

Facts and Figures Prove That Farming Is An Increasing Industry

Turks Are Fatalists

Medicine and Doctors Are Regarded With Little Respect.

One of the reasons the Turks used to be such good soldiers was because contempt for life is the essence of the faith for which they fought. "Divinely calm" are words that have been employed to describe the profound and complete resignation to "the will of Allah," which fatalism is an integral part of the Mohammedan faith.

The pious Mohammedan has ever present in his mind the end of earth and the beginning of life beyond. The Turk is said to consider himself as an individual camped in this world, as his nation has so long been camped in Europe. And he considers the joys of life only shadows in comparison with the everlasting delights which await him in paradise.

Such a view of life and death causes the common Turk to regard medicine and doctors with little respect. For, according to his belief, if he has heard the call "Return," he will die, doctor or no doctor. And if the appointed time has not yet arrived he will recover, so why be troubled with a "charmer" or his bill?

Rush To Fort Norman

Hudson's Bay Company Warns Incoming Travellers To Fort Norman To Apply Early.

Prospectors and adventurers planning to join the expected rush into the Fort Norman oil fields in the spring are warned that only a comparatively small number of them can be taken to the district by the river steamers operated by the Hudson's Bay Company on the Mackenzie.

Reports that the company is contemplating an extensive boat building program for the Mackenzie River route, are denied. Construction of a river steamer to replace one now in use is unavoidably delayed, and this year's plans are limited to two gasoline tugs and three freight barges.

"It is expected," says an official announcement by Angus-Brabant, fur trade commissioner for the company, "that these additions to the company's fleet will take care of their own requirements and such outside freight and passenger traffic as they have previously been in the habit of carrying."

Improvements to their transport system, it is added, are for the company's own trade requirements.

Travellers and prospectors are warned that the company cannot guarantee to carry passengers and freight which has not been accepted by their transport department at Edmonton. Priority of application will govern in this matter, it is understood.

The Origin of Meteors

It Is Conceivable That They Are Fragments of Smashed-up Worlds.

No question has been more disputed among astronomers than that which concerns the origin of "shooting stars"—more properly called meteors. Laplace was of opinion that they came from volcanoes on the moon. A recent authority, Sir Robert Ball, thought that perhaps they were thrown out from terrestrial volcanoes in the distant past. What we are able to observe of them from specimens that fall upon the earth would seem to indicate that they are debris of some kind. They are plainly fragmentary in character, and when not of mere stony stuff are of various metals, chiefly iron. It is entirely conceivable that they are fragments of smashed-up worlds, but the theory that they are debris of comets that have gone to pieces is more plausible. Meteors entering our atmosphere travel through it at rates which seem to vary from 10 to over 100 miles a second. Friction rapidly burns them up, so that probably only the slow ones are able to reach the earth without being entirely consumed.—Philadelphia Ledger.

Two Classes of Bread in Italy.

Italy would have what amounts to two grades of bread under an amendment to the bill increasing bread prices which is proposed by the government. One grade would be cheap and made especially for the use of the poor people of the country, and the other would be known as the "luxury bread" which would bear part of the cost of the cheaper bread.

Much has been said and written

during the past year about the exodus of population from the farms to the cities and towns both in Canada and the United States, and from time to time, various suggestions have been put forth to remedy the situation. Vacant farms there are in different parts of the country, and always will be, but it can hardly be said, for that reason, that farming is losing its attractions or is, as a whole, a declining industry.

Certainly this is not the case in Western Canada, where land brought under the plough is steadily increasing, and where the crop output, year by year, is showing appreciable gains. According to the Canada Year Book, the area of occupied farm lands in the three prairie provinces has increased 25.04 per cent. in the five-year period 1911-1916, or from 58,623,117 acres to 73,300,135 acres, the province of Alberta showing the greatest increase, but Saskatchewan the greatest area. The same situation is found regarding the number of farms, Alberta leading with 15.53 per cent. of increase and Saskatchewan 7.92 per cent., but having over one thousand farms more than the former.

Manitoba, with a much smaller percentage of increase, cannot be fairly compared with her sister provinces, for it was the first western province to be settled, and until 1912, when its area was doubled by the passing of the Boundary Extension Act, her size was but one-half of either Alberta or Saskatchewan. By the revision of the boundaries, however, Manitoba received an additional 114,000 acres. The greater part of the province is still the property of the crown and open to homestead, though some, of course, is held by private companies.

It is interesting to note that the size of the greatest number of western prairie farms is a unit between 101 and 200 acres, with a unit between 201 and 320 acres next following. Students of farming statistics have always claimed that as mixed farming became more popular, the size of the farm unit would decrease, and in view of the foregoing facts, it would seem as if their contentions were justified.

Whether the popularity or unpopularity of farming is on the increase, as yet untouched, lies waiting the coming of the tiller of the soil, it is easy to understand how boatloads and trainloads of incoming settlers are swallowed up almost without trace or impression.

In the face of repeated claims that emigration from Canada is as steady and constant as is immigration, even sceptics will admit there is room for doubt in the facts of increase in population and steady annual increase in the area under crop and its market value.

Met Death Alone

Pitiful Story of Duluth Citizen Who Died From Exposure.

The story of an unsuccessful fight against death from scurvy by Dr. A. O. Reinhardt, of Duluth, who left The Pas in August, 1919, for a trap line on the Barren Lands, 200 miles from the nearest trading post, has just been reported to the Manitoba Provincial Police.

It was not until October last that he was found and recovered the body in a shack. A diary, the first entry dated November, 1919, was found with the body. An entry made the latter part of March, 1920, shows that he was bed-ridden and had taken all his supplies to bed with him. Unable to move out of bed, his fires went out, and gradually his water supply became exhausted or frozen, and he slowly perished from disease, thirst and frost. The last entry in the diary is dated April 9, 1920.

The diary of Reinhardt shows that in order to prevent himself from taking his own life he had tampered with the mechanism of his revolver.

During the early part of his illness he attempted to cook food for himself, but gradually grew weaker. His nose, his stove and utensils to his bedside but was unable to move around to cook anything and so died alone of cold and starvation and scurvy. No one lived within hundreds of miles of the shack.

Bad Blood Fatal To Good Looks

Easy Enough to Restore Both
By a Simple Home Remedy
That Costs But a
Quarter.

Bad looks and bad health go together. To look young, to be happy, to enjoy life, and be always at your best you must keep your blood pure, your liver active, your bowels well regulated. These are the prime essentials to a happy, healthy old age. If you want a positive guarantee of good health, you can easily find it in the regular use of Dr. Hamilton's Pills, which for forty years have been keeping thousands of people in the pink of condition. It's no experiment to use Dr. Hamilton's Pills as a regular round of life. They are composed of certain extracts and herbs that search out disease, that regulate tone and strengthen the system.

If in need of better health, if lacking in strength, if subject to headaches, blood disorders, constipation, lack of appetite, and indigestion, "it's safe to say you will be relieved quickly by using Dr. Hamilton's Pills, sold everywhere in 25c boxes."

Dairying in Saskatchewan

Added More Than Twenty Million
Dollars to the Wealth of Province
Last Year.

It would be impossible to estimate in terms of dollars and cents the effect of the Saskatchewan dairymen's convention which has just concluded at Prince Albert, yet it is not too much to say that it will have a very important bearing on the future prospects of the province. Dairying as an industry added more than twenty million dollars to the wealth of Saskatchewan last year, and still it is only in its infancy and just at this time, when the industry is attracting a great deal of attention, such a convention cannot fail to give it a great impetus. Everyone attending it came away with a new and great enthusiasm, and with a new insight into the fundamentals of dairying. It was eminently practical in form, and experts on every branch of the industry were present to give the delegates valuable information that will enable them to advance their own interests as well as the interests of the industry.

One of the most interesting features of the convention was the cattle judging competition for boys and girls. It demonstrated that in Saskatchewan youngsters are growing up who can look over a milch cow and at a glance, tell pretty well what its ability in milk production will be—and that is a mighty valuable asset to a farming community. A Melfort team which stood eighth in the competition last year, determined with a good deal of pluck to come back this year. It did and carried off first prize. A Lashburn team, which had travelled 250 miles and paid all expenses for the sake of a chance to win a \$12 prize, took second place. Then came three Birch Hills teams in order demonstrating the impetus that the establishment of a creamery there has given to the industry in that part of the country.

The cattle judging competition aroused great enthusiasm. As the youngsters showed their skill in picking

ing out the good points of cattle, the sentiment of the delegates found expression in the offer of special prizes. Dr. A. McLaughlin, of Rosbush, offered a purchased Holstein bull to the first prize winner. C. E. Thomas, of Lloydminster, offered a purchased Ayrshire heifer to the second prize winner. Other special prizes of cash were offered. It is not easy to estimate a big group of farmers, but the competition as a whole made the atmosphere of the convention resemble an old-fashioned revival meeting. It is only necessary to say that ninety-nine out of a possible hundred, was the prize winning score in the competition, and that the nineteen teams contesting were "bunched."

To review all the events of the gathering would require a long article, but mention must be made of the splendid showing in the butter competition of L. W. McGrath, of the Birch Hills Creamery. Mr. McGrath is gaining fame as the "Wheel" of the dairying industry of Saskatchewan. His butts, making in the judgment of experts, is perfect so far as workmanship is concerned, and the only weakness they remarked was in the flavor of the butter, which was a point or two off, and for which the condition of the cream when received is responsible. This, in fact, was the point impressed on the producers by all the experts. Getting the cream to the creamery in first-class condition is the secret of good butter, and good butter is the secret of an assured market and a good price.

Alberta's Increasing Potato Crop

Crop Now Takes Its Place as the
Fourth Largest in the Province.
More than seven and three-quarter million bushels of potatoes were grown in Alberta in 1920, and this crop now takes its place as the fourth largest in the province, following wheat, oats and barley. Potatoes are becoming a more important crop every year, and the total production in the province has increased by more than three and a half million bushels since 1915.

Tests made at the University of Alberta at Edmonton show that the Irish Cobbler leads all other varieties of potatoes both in yield and in the fewness of the unmarketable potatoes, 387 bushels being the average yield to the acre, with only one and a half per cent. of unmarketable potatoes. The Rochester Rose variety yielded 343; Early Bovee, 276; Carmen No. 1, 266; Wee McGregor, 243; Early Ohio, 234; and Table Talk, 245 bushels to the acre.

Greater diversity of farming with potatoes as a regular rotation crop is being advocated by Professor G. H. Cutler, of the Field Husbandry Branch of the Alberta University.

Wool Market Glutted

Why Don't They Put Some of the
Surplus Wool Into Cloth.

The world has never seen such a glut of wool as exists at the present time. What to do with it is a great economic problem. There is enough on hand to meet all possible needs for two years. Great Britain holds 2,000,000 bales of the volume she accumulated between 1915 and 1918. Australia still has nearly all the clip of two seasons. South Africa has an enormous store; so has Argentina. American producers have not been able to sell more than a quarter of their output since 1919.

Meanwhile, to make matters worse from the standpoint of the wool growers, many mills are shut down because of lack of orders. They are selling their cloth by auction. This will inevitably mean cheaper clothing; but it must be remembered that not more than five pounds of wool enter into a suit of clothes.—Ottawa Journal.

Real God's Acres

War Cemeteries in France Reported
Well Kept.

That the war cemeteries in France and Belgium are real "God's Acres" and not the ill-cared-for and unlovely spots that many supposed them to be, was the message to bereaved parents and relatives delivered by Captain the Rev. M. Mullineux, M.C., in Christ Church Cathedral, Montreal. Representative in France of the Canadian Red Cross and honorary chaplain to New Zealand, with whose forces he served for over four years, Captain Mullineux has come here to tell Canadians of the way their dead are cared for and how the graves may be visited.

Captain Mullineux described briefly the work of the St. Barnabas Hospital, which he organized in France just over a year ago for the purpose of assisting relatives to visit graves.

England to Hold A Potato Conference

Best Methods of Raising and Cultivating Will Be Discussed.

The Royal Horticultural Society acting in conjunction with the British Ministry of Agriculture, has decided to hold an International Potato Conference in November, 1921, with the view of discussing the whole question in connection with the best methods of raising and cultivating this root.

The chief topics to be discussed at the forthcoming conference will be the industrial and commercial use of the potato, seed production and the cultivation of new varieties. The preparation of the program of the conference and the arrangement of the papers to be read have been left in the hands of a sub-committee. Invitations to foreign delegates to attend the conference will, it is stated, be sent out shortly. It is interesting to note that already the United States Department of Agriculture has agreed to send delegates and to make an exhibit of various American varieties.

Heart Weak, Nerves Shattered After the "Flu."

In a large majority of cases those who survived the last epidemic of Spanish influenza were left with weak hearts, shattered nerves, impoverished blood, and the whole system has been left in such a general weakened and exhausted condition that it has been impossible to get back your old health and strength.

If you are in this condition there is only one thing to do; take a course of Milburn's Heart and Nerve Pills and see how quickly your heart will be strengthened, your nerves toned up and your blood enriched.

Mrs. W. W. Pearce, 14 Seaton St., Toronto, Ont., writes: "I was left with a weak heart and in a rundown condition from the 'flu.' My nerves were badly shattered, and I had such pains in my heart I could not sleep much at night. I took several doctors' medicines without getting any better. My husband got me to try Milburn's Heart and Nerve Pills, and after I took one box I got relief; after taking six boxes have been well and not bothered since."

Price 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

A Military Course

Saskatchewan College Has Military
Program This Year.

The University of Saskatchewan will have a definite military course for the year 1922, according to an announcement made after a recent conference between President Murray, of the University, and Brigadier-General Ormond, O.C., No. 12 District.

One hour each week will be devoted to drill and physical training and one hour to theoretical work. Lectures will be given on military science by officers appointed by the Militia Department, covering the strategy of the Great War, with particular reference to campaigns and engagements in which the Canadians took part.

Minard's Liniment For Diaperers.

Coffee was not known to the Greeks or Romans.

Many children die from the assaults of worms, and the first sign of mother's duty should be to see that their infants are free from these pests. A vermifuge that can be depended on is Minard's Worm Powders. They will not only expel worms from the system, but act as a health-giving medicine and a remedy for many of the ailments that beset infants, entangling them and endangering their lives.

Your New House.

Happy the man, in these days of shortage, who owns a house that is neither ugly nor uncomfortable! And happier still is the prospective builder who will conform honestly to good standards for the new structure! We may sigh for the good old days of cheap materials and abundant labor, but the responsibility for a pleasant new house is no less personal now than formerly. Of course utility should always be considered, but that is no reason why a house should not also have simplicity of line and good taste in ornament.—Youths Companion.

For Sore Throat Cold in the Chest, Etc.

MINARD'S
"KING OF PAIN"
LINIMENT

YARMOUTH, N. S.

OLD STANDBY, FOR ACHES AND PAINS

Any man or woman who keeps
Sloan's handy will tell you
that same thing

ESPECIALLY those frequently attacked by rheumatic twinges—Sloan's Liniment is a counter-irritant, Sloan's Liniment soothes the congested and painful muscles, relieves the aching joints, soothes the inflamed muscles, strain, joint stiffness, sprains, bruises, and the results of exposure. It is a healthy and useful remedy for all aches and pains. It is sold by all druggists—35c, 70c, \$1.00.

(Made in Canada)

Liniment (Pain-
killer)

No Help Needed.
Stella—Did you call for help when he kissed you in the dark?
Maybelle—Silly! I should say not. He didn't need any help.—Boston Globe.

H. A. Mackie, member for Edmonton East, declares that the new government oil regulations are blocking private enterprise.

The Hindus have no word for "friend," but use the word "brother" instead.

Despoiling Forests

Great Medicinal Tree Disappearing
Rapidly From Pacific Coast.

A warning that foreign cutters are despoiling the forests of British Columbia by destroying root and branch, all the native supplies of the cascara sagrada bush, is being sounded by botanists and timber cruisers interested in preserving this valuable medicinal bark. The legislature is to be asked at the coming session to pass legislation to preserve this and other valuable barks and herbs from destruction.

The cascara, referred to in botanical works of ten years ago as the "Pacific Coast's great gift to mankind," is said now to be so depleted in Oregon and Washington as the result of reckless gathering that there is no longer any to be found within reach of transportation. Prices have risen from two cents to more than ten cents a pound.

The Pretoria Government recently tried an experiment with a view to producing rain by dropping dust on clouds. An aeroplane ascended to 8,000 feet, but the dust failed to cause rain.

Kerguelan Island, in the Southern Indian Ocean, is over 3,000 miles from the nearest mainland, and may claim to be the most isolated island.

Paris society women send their pet dogs to school, where they are taught manners.

Quickly Relieves Constipation

Don't let constipation poison your blood and curtail your energy. If you take CARTER'S LITTLE LIVER PILLS today and your trouble will be relieved. For dizziness, lack of appetite, headache and blotchy skin try them. Purely vegetable. Small Pill—Small Dose—Small Price.

Irish For Alberta.
Tired of the strife that has disrupted their native heath, several farmers from the vicinity of Dublin, Ireland, intend coming to Western Canada during the coming spring, according to information that has reached the Calgary Board of Trade.

Send for list of inventions wanted by Manufacturers. Fortunes have been made from simple ideas. "Patent Protection" booklet and "Proof of Conception" on request. HAROLD C. SHIPMAN & CO. PATENT ATTORNEYS 20 BATHURST STREET, OTTAWA, CANADA

SUN LIFE ASSURANCE

COMPANY OF CANADA

1871- HEAD OFFICE MONTREAL 1921

JUBILEE YEAR

HALF a century has elapsed since the Sun Life Assurance Company of Canada issued its first policy in 1871. The figures submitted herewith indicate the size, strength and outstanding position to which the company has attained among the life assurance institutions of the world, as a result of its operations during those fifty years.

SYNOPSIS OF RESULTS FOR 1920			
ASSETS			
Assets as at 31st December, 1920	\$114,839,444.46		
Increase over 1919	9,127,070.21		
INCOME			
Cash Income from Premiums, Interest, Rents, etc., in 1920	\$28,781,578.43		
Increase over 1919	3,047,377.33		
PROFITS PAID OR ALLOTTED			
Profits Paid or Allotted to Policyholders in 1920	\$1,615,645.66		
SURPLUS			
Total Surplus 31st December, 1920, over all Liabilities and Capital	\$3,364,667.18		
(According to the Company's Standard, viz., for insurance, the 100 (100) Table, with 3 1/2 per cent. interest, and for annuities, the U. S. Select Annuity Tables with 3 1/2 per cent. interest.)			
TOTAL PAYMENTS TO POLICYHOLDERS			
Death Claims, Matured Endowments, Profits, etc., during 1920	\$10,900,402.00		
Payments to Policyholders since organization	\$92,187,934.36		
ASSURANCES ISSUED DURING 1920			
Assurances issued and paid for in cash during 1920	\$106,691,266.23		
Increase over 1919	20,342,410.70		
BUSINESS IN FORCE			
Life Assurances in force 31st December, 1920	\$486,641,235.17		
Increase over 1919	70,232,773.12		
THE COMPANY'S GROWTH			
YEAR	INCOME	ASSETS	LIFE ASSURANCE IN FORCE
1871	\$43,250.83	\$4,401.05	\$1,084,750.00
1875	\$141,028.3	\$73,232.33	\$2,732,323.00
1900	\$80,078.37	\$473,314.10	\$18,769,265.42
1905	\$279,254.52	\$1,046,201.17	\$29,250,846.33
1910	\$579,453.04	\$2,144,790.27	\$43,549,770.00
1920	\$28,781,578.43	\$114,839,444.46	\$486,641,235.17

The Young Mother

Youth, with its vitality, makes for the young mother's health and happiness. But later, maternal experiences bring a different result. The care of a family, multiplied household duties, and very often the weakness caused by womanly disease, tend to prolong the suffering and to make convalescence a slow and weary process. Many women—perhaps your own neighbors—have had beneficial experience with Dr. Pierce's Favorite Prescription, which prepares the prospective mother. Send 10 cents to Doctor Pierce's Invalids' Hotel in Buffalo, N. Y., for a trial package of tablets.

HAMILTON, ONT.—"I was advised by a practical nurse to take Dr. Pierce's Favorite Prescription as a tonic during expectancy, and I have had every reason to be grateful for her advice, because it kept me in perfect health and I had practically no suffering. The 'Prescription' not only benefited the mother, but I am positive the child benefited, too. I would not hesitate to recommend the 'Prescription' to every expectant mother."—Mrs. O. GRIER, 46 Hess Street, N.

B.C. Loans to Industrial Concerns.
British Columbia's department of industries granted loans amounting to \$630,658 to industrial enterprises during 1920, according to a report tabled in the legislature by Hon. John Oliver, premier and minister of industries. Loans totalling \$3,044,050 were applied for during the year.

The less you need looking after, the more will be the boss think of you.—Bert Moses

NOTHING TO EQUAL
BABY'S OWN TABLETS

Mrs. Georges Lefebvre, St. Zenon, Que., writes: "I do not think there is any other medicine to equal Baby's Own Tablets for little ones. I have used them for my baby and would use nothing else." What Mrs. Lefebvre says thousands of other mothers say. They have found by trial that the Tablets always do just what is claimed for them. The Tablets are a mild but thorough laxative which regularizes the bowels and sweetens the stomach, and thus banishes indigestion, constipation, colds, colic, etc. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

An Impression Of Socialism.
"Father," said the small boy, "what is a Socialist?"

"A Socialist, my son, is a person who doesn't care much what kind of government he gets so long as it is something else."—Washington Star.

World Happenings
Briefly Told

In addition to other troubles, sleeping sickness is reported in Ireland. German paper manufacturers are now underselling Canadian newspapers.

The Alberta Government has confirmed the taking over of the E.D. and B. C. Railway by the C.P.R.

The Canadian General Accountants' Association has decided to bar women from holding certificates.

Suicides in the U.S. in 1920 numbered 6,171, including 2,604 women and 707 children.

Miss Emma Goldman was one of the orators at the funeral of Gen. Kropotkin at Moscow.

The dispute between the management and employees of the Canadian National Railway may be aired in the House of Commons.

Premier Lloyd George, speaking in the Commons, emphasizes the need of co-operation between all units of the empire on questions of imperial defense.

Southern interests are reported to be contemplating purchase of the Toronto World and the Montreal Herald. The World may be changed to an afternoon publication.

Capt. Rev. M. Mullineau, Canadian Red Cross, says that the Canadian cemeteries in France are "real God's acres," being well cared for and beautiful.

Two-thirds of an audience in Toronto, listening to an address by Lieut. Dempster, on his experiences as a prisoner of war in Russia, openly declared themselves Bolshevists.

The Union Farmers State Bank of New Salem, North Dakota, has closed. Officials of the bank said reserves had fallen below the legal limit and that the bank would re-open later.

Agitation against infected shaving brushes has resulted in virtually paralyzing the Japanese bristle industry, and the government is taking steps to open a national disinfection office at Kobe.

All records for construction of merchant vessels were broken by British shipyards during 1920, when 618 vessels of 2,055,628 tons were completed, exceeding the 1919 total by over 400,000 tons. The world's output for 1920 was 1,759 vessels of 5,816,665 tons, a decrease of 1,500,000 tons.

Sun Life Company
Makes Big AdvanceFIFTIETH ANNIVERSARY OF
SUN LIFE.

The year 1921 marks the fiftieth anniversary of the Sun Life Assurance Company of Canada which in the half century of its existence has grown to be one of the largest and most successful life insurance companies in the world.

A comparison of the growth of the company's business by decades is perhaps the most convincing proof of the steady development of public confidence towards it.

One year after it was organized, in 1872, the company's income was \$48,000; its assets, \$96,461, and it had written policies for a total of \$10,640,350. By the year 1880 the income had grown to \$141,402, with assets \$473,682 and insurance in force of \$3,897,139. From this time onward the development of the company, not only in Canada but in stretching out to many other countries of the world, proceeded at a rapid pace, as the tables for the next four decades indicate:

1890—Income	\$ 889,000
Assets	2,473,010
Insurance in force	16,759,030
1900—Income	2,789,000
Assets	10,496,000
Insurance in force	57,980,000
1910—Income	9,575,000
Assets	38,164,000
Insurance in force	143,349,000
1920—Income	28,751,000
Assets	114,839,000
Insurance in force	486,041,000

Such a record stands alone in the annals of life insurance companies in Canada. Nor after such a great achievement is there any sign that the company has any intention of standing still on its laurels, for during the past year there was written in new insurance upwards of \$106,000,000, which in itself exceeds by \$20,000,000 the high mark of 1919, which up to that date was a record for the company. It is interesting to note that during its fifty years of existence the Sun Life has paid out to its policy-holders or their beneficiaries over \$100,000,000. Details of the financial statement of this company for the past year appear elsewhere in this issue and will be studied with more than usual interest in this its Jubilee year.

MADE IN CANADA

Canada's Mineral Wealth.
The total value of Canada's mineral production during the year 1920 is estimated at \$200,000,000 as compared with \$176,686,390 in 1919.

RELIEVE YOUR COLD
WITHOUT MEDICINE

Just Breathe "Catarrhozone."
Its Balsamic Vapor Does
the Rest.

It's a tiny germ that sets up the irritation that makes colds so disagreeable. Colds die quickly if Catarrhozone is used, simply because the vapor of Catarrhozone instantly destroys the germ that keeps the cold alive.

Every breath you draw through the inhaler fills the whole breathing apparatus with pure piney essences that stops colds at their very beginning. You experience a pleasant sensation of relief at once. Soreness, congestion and irritation leave the nose and throat, the head is cleared, and every trace of cold or catarrh is relieved. Catarrhozone is so sure, so pleasant, such a safe remedy for winter ills that you can't afford to do without it. Get the dollar outfit, it lasts two months and is guaranteed to relieve: small size 50c. and size 25c. at dealers or The Catarrhozone Co., Kingston, Canada.

A Unique Barometer

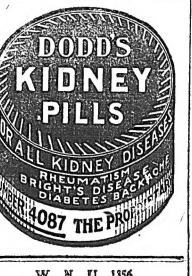

Stone In Finland Which Forecasts
The Weather.

In Finland there is a stone which like a barometer, forecasts the weather. This stone, it is said, turns black or blackish gray when rain or bad weather is approaching, and small white spots at the approach of clear weather. Many attribute the changes to the stone's fossil mixed with clay and containing rock salt, nitre, or ammonia, which, according to the amount of water vapor which the air contains—attracts the dampness or gives its own off. When it attracts it becomes black; when it gives off moisture and the salt gets dry, the stone becomes white, indicating that the air contains little moisture.

Rheumatism Relieved In 1 to 3 Days.
Rheumatic Rheumatic Remedy is a wonderful medicine in the treatment of acute or inflammatory rheumatism, chronic rheumatism, lumbago, neuralgia, and all ailments due to rheumatism. It cures in 1 to 3 days. All druggists.

Built Church From One Tree.
One tree made a church at Santa Rosa, Calif. Every part of the building, except the flooring, came from a giant redwood, which yielded seventy-eight thousand feet of timber and many shingles.

Newfoundland was England's first possession beyond the seas.

W. N. U. 1356

Compose Suit
Of Cafe au Lait
Velour

By Gertrude Beresford.

The compose suit is one that appeals to many women because of its practical qualities. This model is made of cafe au lait velour in plain and striped weaves. The former is chosen for the coat. The long collar, however, shows a pleasing use of the striped fabric. The skirt, too, is made from the striped velour as well as the jaunty turn back cuffs. The soft tricornie of brown satin reveals a soft draping on the side. The type of suit just described suggests an excellent way of making over clothes. Sometimes a dress gets rubbed in the bodice while the skirt is still quite presentable. By getting enough material for a coat you may readily evolve a delightful suit.

To Improve Breed of Cattle

B.C. Dairymen Are Offered a Unique
Opportunity.

A unique effort towards the elimination of the scrub bull in British Columbia has been made by Mr. P. D. Hillis, of Victoria, one of the members of a firm of pure-bred Holstein cattle farmers, who offers to exchange without cost a pure-bred Holstein bull calf for a scrub calf with any dairyman who is now using the scrub bull. This generous offer was made to the provincial livestock commissioner who is naturally enthusiastic about the scheme, which should give a great impetus to the movement on foot throughout Canada towards better sires. The dairy herd of Mr. Hillis himself is an example of the results obtained by the use of pure-bred stock. On his farm not one of the cows is producing less than 13,000 pounds of milk a year, while some approximate or exceed 20,000 lbs. The calves that it is proposed to exchange will be sired by "Westport Lad," recognized as one of the leading bulls of the breed.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying a reliable remedy—Mother Graves' Worm Exterminator.

New Zealand was the first country in the world to acknowledge the political equality of the sexes by giving women full suffrage in 1893.

Excellent for Croupy Children.
When a child is suffering with croup it is a good plan to use Dr. Thomas' Electric Oil. It reduces the inflammation and loosens the phlegm giving speedy relief to the little sufferer. It is equally reliable for sore throat and chest, carache, rheumatic pains, cuts, bruises and sprains. Dr. Thomas' Electric Oil is regarded by many thousands as an indispensable of the family medicine chest.

The schools for girls in Copenhagen are reckoned among the best in Europe.

A Powerful Medicine.—The healing properties in six essential oils are concentrated in every bottle of Dr. Thomas' Electric Oil, forming one of the most beneficial liniments ever offered to the use of man. Many testify as to its power in allaying pain, and many more can certify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells.

Tiger beetles, found all the world over, run down their prey by speed of foot.

How anxious people are to help you when you are in a position to help yourself.

nant rotates in the direction oppo-
site from that taken by one in the
northern hemisphere.

ONE WOMAN'S
EXPERIENCEOf Interest to Childless
Women.

Toronto, Ontario.—"I suffered for a long time from a female nervous inflammation, and a terrible backache caused by that condition. One day one of your booklets was left at my door, and I read how other women with troubles like mine had been made well, so I got a bottle of Lydia E. Pinkham's Vegetable Compound and a package of Sanative Wash, and it helped me wonderfully, and I now have the finest little baby boy that any mother could want. I want to recommend Lydia E. Pinkham's Vegetable Compound to any woman who has female troubles."—Mrs. Joseph La Bella, 773 Shaw Street, Toronto, Ontario, Canada.

The experience of Motherhood is a trying one for women because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy and strong, and this good old-fashioned root and herb remedy contains no narcotics or harmful drugs.

In many homes once childless there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy and strong, and this good old-fashioned root and herb remedy contains no narcotics or harmful drugs.

The Parent And The Church

The church in a community is capable of exerting a great influence for good in the way of moulding the characters of our boys and girls, but their are some people who fail to realize the good that a church can do in a community. It will pay the father and mother to give the church a little of their assistance, not only financially but assisting in all its branches, for it is the only institution which shows any interest in your boy or girl.

The evil in men's heart has not been cast out because they had to walk through the fiery furnace of a world war. To-day there are many people, sinking into the abyss of despair and others are behaving with appalling frivolity.

What is our hope for the future? It is the home and the church. The duty of the parent is to form and fashion the character of your child so that it will grow up to be a good citizen. Are you as a parent doing your part? Are you trying to bring your children into right relationship with Christ the pattern for all?

Now the purpose of the church is not so much to make denationalists, but men and women with strong consistent characters. A full fledged, full-pledged life. A Christian life; trained in the ways of the Kingdom. What the church is concerned about is that the boys and girls may grow up to have characters after the like of Christ. An institution that stands for the making of Christian men, world visioned men, and Kingdom building men, should have the support of every citizen.

The Hearts of Humanity Next Friday

Canada's answer to the great call to arms when a Prussian autocrat declared war upon democracy, has been depicted in "The Hearts of Humanity" an excellent production which will be shown at Chinook next Friday night, Feb. 25. A close-up view of the blowing up of a trench in No Man's Land is one of the hundreds of thrilling features in this great production. Don't miss seeing this wonderful picture. Admission one dollar.

U.F.A. Organizers Address Chinook Local

The regular meeting of the Chinook U.F.A. Local was held last Friday evening. The chief feature of the evening was the addresses of Mrs. Fraser and Mr. Chas. Harris, directors of the U.F.A. organization for Medicine Hat riding. Mrs. Fraser emphasized the importance of the woman's part in U.F.A. activities and the necessity of securing the name of every woman on the voters' list, and of seeing that every immigrant had taken out naturalization papers.

Mr. Harris laid stress on the importance and necessity of every farmer joining up with the organization. He went on to show how much the U.F.A. had already done for the farmer, and what might be done in the future if all got behind the movement. He adduced evidence to show that President Wood was worthy of the confidence of the rank and file as leader of the farmers of Alberta.

TO RENT—Three roomed house. Apply to S. E. Taylor, Chinook.

Bonspiel Notes

For a real sport you've got to hand to J. W. Todd.

Dunn's rink certainly played some fine games in the 'spiel.

A very unfortunate accident happened while Cruickshank and Deman's rink were playing in the Grand Challenge. Mr. Cruickshank was sweeping one of his rocks into the "house" when he slipped and fell on the ice breaking his collar bone. This accident marred the game and was most unfortunate as Cruickshank's rink were playing strong and stood a good chance to get into the "jellery."

Deman's rink is to be congratulated on their splendid performance during the 'spiel. This local rink put up a good fight winning the two of the best rinks from Oyen, and carrying off the second prize in the Merchants event.

We noted with pleasure a few familiar faces in the Oyen rinks. Too bad Archie you failed to carry off the Grand Challenge this year.

The committee is to be congratulated on their choice of prizes. And we would not forget to mention Mr. Woodruff for the way he so nicely displayed the prizes in his store window.

You Buy Your News of the World at Less Than the Cost of the Paper it is Printed On.

DID you ever pause to consider the important part that a modern newspaper plays in your daily life?—through it you secure all your news of the world.

IN London an important event occurs—the same day you have the news. The League of Nations Conference in Geneva discuss a measure that effects an international world policy which in turn affects you personally perhaps,—within a few hours you read the details in The Herald.

THE price of grain, beef, pork, dairy products and farm produce fluctuates from day to day—The Herald Market Page gives you the very latest quotations—keeps you closely in touch with all markets and enables you to buy and sell intelligently and to advantage.

IN 1920 each subscriber to The Herald received 130 lbs. of white newsprint paper which costs 8c per pound, or a total cost of \$10.40 per subscriber.

YOU can buy The Herald delivered by mail for one year, and get all the news all the time for less than the cost of the white paper.
